

# DOLOMITE

*Care | Maintenance Card*

Taking care of your *dolomite* is important to maintain its natural beauty.

- **Regular Cleaning:** Wipe down the countertop daily with a soft cloth and a gentle pH-neutral cleaner. Avoid using harsh chemicals or abrasive sponges, as they can damage the surface.
- **Spill Management:** Promptly clean up spills, especially those from acidic substances like lemon juice, vinegar, or wine, to prevent etching or staining. Blot the spill with a soft cloth instead of wiping to avoid spreading it.
- **Sealing:** Depending on the finish of your dolomite countertop, it may benefit from periodic sealing. Check with your manufacturer or installer for specific recommendations. Sealing can help protect against stains and make cleaning easier.
- **Use of Cutting Boards and Trivets:** Always use cutting boards when chopping food and trivets or hot pads for hot pots and pans. This will prevent scratches and thermal shock, which can damage the countertop.
- **Avoid Excessive Weight:** Do not sit or stand on the countertop, as dolomite, like all natural stone, can crack under excessive weight.
- **Regular Maintenance Checks:** Periodically inspect your countertop for any signs of damage or wear, and address any issues promptly to prevent them from worsening.
